Wedding Planner Website:

17.01.2022

--Anita Wankhade.

Introducation:

A wedding planner website is a professional who assists with the design, planning and management of a client's wedding . Weddings are significant events in people's lives and as such, couples are often willing to spend considerable amount of money to ensure that their weddings are well-organized. Wedding planners are often used by couples who work long hours and have little spare time available for sourcing and managing wedding venues and wedding suppliers.

Objective:

The main objective of the project on online wedding planner is to manage the details of wedding,Latest posts, Event, Contact, Login. It manage all the information about details of wedding, Quotation, Event manage.functionalities provided details wedding planner website.

❖ Provides the searching facilities based on various factors.such as wedding, Event, vendor,contact,Team.
❖ Wedding planner also manage the Quotation details package and wedding details.
❖ It tracks al the information and description of the wedding, latest post.
❖ Shows the information and description of the wedding, event.
❖ Manage the information of wedding.

System User:

1. Management Staff
2. User

➢ Management Staff:
    The management roles on this website will look up information about their wedding on their personal website. The website serves as a management forum for analyzing the status of the wedding.Throught this website, management can view the activity status of user and client as well as evaluate them

➢ User:
    The user has their own profile, where they can website in easily handling personal wedding websites are mostly to give the guests information on the wedding such as the date, time and location, the websites can also include things such as event and planning bibliographies in which viewers of the wedding website can interact with the bride.
